Job reference

Mr. Ikhsan Habibi, born on in , worked for me from 22.06.2020 to 15.01.2021 as a **working student** in the field of software and web development. Mr. Habibi has completed a work performance of 20 to 40 hours per week during this period.

My activities revolve around consulting, planning and software and web development on behalf of medium-sized companies.

Mr. Habibi supported my team as a full-stack developer in the area of backend and frontend development. Java, PostgreSQL, AngularJs and Vue.js were used. He also worked independently on 3D web development with threejs, customizations of a rich text editor with React for Contentful, and collaborative work with git and Clickup on my behalf.

Ikhsan Habibi has always completed the tasks assigned to him to my complete satisfaction.

He has excelled in outstanding perseverance, loyalty, and conscientiousness, and has worked his way into very difficult task areas independently for long stretches of time.

Once he had learned paradigms and technologies, he was always able to independently apply them to new tasks.

In communication, he was without exception decent, friendly and cooperative.

Hannes Geist
